

Title

Luis Señires and Hiroaki Kurachi

December 2, 2024

Table of contents I

Introduction

Datasets

Findings

Conclusion/Recommendation/Further Research

Introduction

Backgrounds

Research Question

Datasets

Bond issuance

EPI (Environmental Performance Index) by Yale Univ., etc.

- ▶ Calculated each 2 years

Findings

Bond issuance trends

Share in Whole bonds

Green/Sustainability rate

Growth of issuance

other observations which would be helpful for association analysis afterward (or not)

EPI traits

Standardisation by world average

Observation

Should we use transition of ranks, rather than change in score?

Bond \leftrightarrow EPI associations

Conclusion/Recommendation/Further Research
